“Smart” architectural and decoration solutions with the use of natural building materials

Caneplex has over 50 years of experience in the field of building materials and decoration.

This translates into an important experience ensuring the thorough know-how through which emerge targeted solutions for the creation of each space, making the company a key partner of prominent architects, decorators and demanding projects.

The collection of Caneplex Design includes panels from Greek cane, bamboo, willow, branches, foliage, tissues of natural materials, handmade weaves, wallpapers lined with natural materials, imported from their countries of origin, in a wide variety of qualities and types. The materials are continuously enriched in new forms and types.

Excellent value-for-money, responsible customer service, high-level consulting, eco-consciousness and design-construction quality make up the key elements supporting CaneplexDesign's relationship of trust with its partners and those features that outline the ideal profile of a company with international activity and continuous development of its services.

Quality and Certifications

All CaneplexDesign products are of selective cultivation, specific harvest time, natural drying and hot air drying when necessary. For each one of them, the quality control is carried out by local partners while being subjected to phytopathological inspection before and during import. The company is ISO 9001/2015 certified by BQC.

Architecture and decoration

Today, Caneplex Design processes, manufactures and markets a wide range of options in natural building materials. At the same time, the company's tremendous know-how and experience translates into a powerful portfolio of pioneering projects, enjoying a strong acceptance from the community of architects and designers. In recent years Caneplex Design has contributed with its products and know-how to the realisation of projects such as Athens Marriot, Atlantica Group, BlueGr hotels, Caravia beach, Cavo Tagoo, Costa Navarino, Elounda hotels, Epitome Canaves Oia, Four Seasons Astir Palace, Grecotel Hotels & Resorts, Ikos Hotels & Resorts, Mitsis hotels, Nammos group, Sani Hotels, Sbokos hotels, Scorpios beach, Xenos Hotels Olea etc.

The company's progress in the market through the materials and services provided has brought new trends and created a number of stimuli and has established itself in the sector's consciousness as a credible and innovative company for the promotion of purely natural building materials.

Human Resources and Infrastructure

CaneplexDesign's steadily expanding progress is based largely on its skilled human resources and its nationwide network of long-term partners. Additionally, the company has storage facilities, ensuring the fastest possible delivery.
